Product Code – AS-055-A

MASKING LIQUID – BOOTH COAT

Description: Masking Liquid – Booth Coat is a temporary clear coating for spray painting booth's walls, ceiling, floor and other surfaces where accumulated paint over-spray can be removed easily. Booth Coat can also be used as a coating for steel surfaces to eliminate flash rusting or as protection on glass, plexiglass, rubber, cement, aluminium and many such hard surfaces.

Booth Coat represents the ultimate in non-solvent coatings as it is well stabilized against brittleness and will not be softened or penetrated by most solvent-based paints. Booth Coat has no Volatile Organic Compounds (VOCs).

Application: Booth Coat can cause problems if applied wrongly and proper application results in a tough film of uniform thickness with no sagging, less application time and minimal clean-up. Waterborne clear peel-able coating can be used wherever temporary protective coatings are needed to reduce clean-up problems. Booth Coat can be used in spray-booths, floors, windows, walls, machinery, equipment or wherever there is paint over-spray problem, clean-up problem or an emission problem.

Application Technique: For best results, ensure the surface is clean, dry and dust free before application of the tape. Apply even and firm pressure for better adhesion results.

Storage & Shelf Life: The tape should be stored in a cool and dry place and prolonged exposure to the direct sunlight should be avoided. To obtain best performance, the product should be used within 12 months from the manufacturing date.
